

## **ANNOUNCEMENT**

Cyta announces the following, as obliged by Directive 256/2018:

### **We are transitioning to Cyta Fiber and bidding farewell to the copper network**

Cyta is accelerating the migration of all customers to its new fiber optic network and advancing the decommissioning of its copper network. This involves transferring all remaining customers and their services to the optical network within a defined timetable.

Cyta is dedicated to delivering high-quality communication services to every citizen, no matter their location, through the new Fiber network. This upgrade ensures increased reliability, consistent ultra-high speeds, high fault tolerance and improved energy efficiency.

Welcome to a new era in communication, offering unique advantages to everyone!
