

Installation Guide – Super Wi-Fi

Step 1: Placing the Access Point (AP)

Place the access point (AP) on a stable, flat surface, where it can wirelessly connect to your main network.

 Ideally, choose a central location for better Wi-Fi coverage.

Step 2: Power Connection

Plug the AP into a power outlet using the provided power adapter included in the package.

Step 3: Network Connection

A. Wireless Connection via WPS

1. Press and hold the WPS/LED button on the AP for at least 3 seconds.
2. Then press the WLAN/WPS button on the ONT (modem) for 1 to 5 seconds.

LED Indicators:

- During connection: The AP light blinks rapidly (2 times/sec)
- When connected: The AP light blinks slowly (once every 6 seconds)

B. Alternative Method – Wired (Ethernet)

1. Connect the AP to the ONT using an Ethernet cable.
2. Once the LED stays solid, remove the cable.
3. Move the AP to its final installation location.

Step 4: Wall Mounting (Optional)

-  A wall mount bracket is included for optional wall installation.
-  For instructions, scan the QR code located on the back of the device.
