

FREE VPN CONNECTION FROM HOME!

Connect to your business network, from home, to access your files and applications.

To be able to connect from home, we provide you with a management account as well as passwords that your employees can use to access your business network from their computers at home. You can apply for up to 10 accounts per network.

The facility is provided to customers who have their business network connected with Cyta's VPN networking products, either DSL Business or Ethernet access.

It is also provided to customers who have their business network connected with Internet Business or Dedicated Internet products over Ethernet, however at least one connection is needed with Cyta's VPN networking products.

Instructions for setting up and using a home VPN connection.

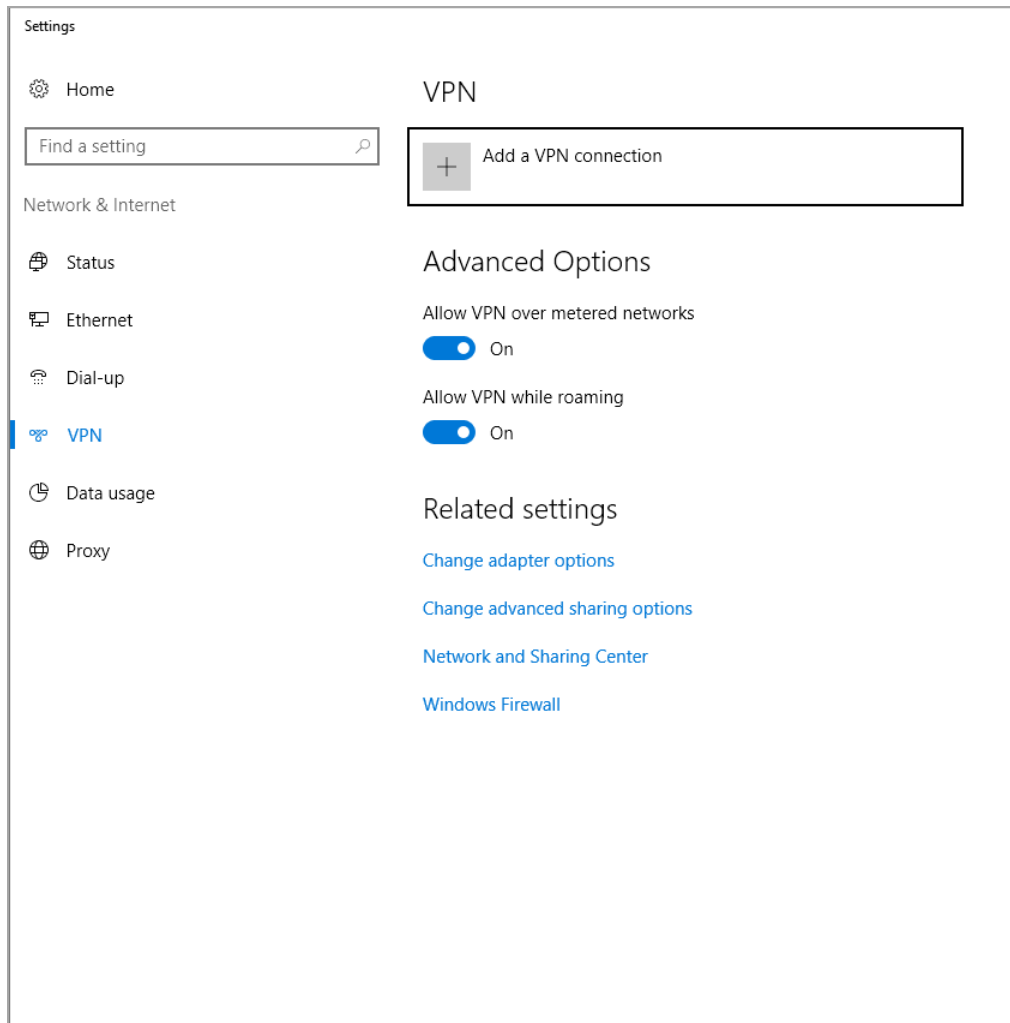

(Windows 10)

1. CONNECTION SETUP

On the screen Windows Settings > VPN :

Click on 'Add a VPN connection'

FREE VPN CONNECTION FROM HOME!

On the screen VPN enter the following settings:

Server name or address : **195.14.129.98**

VPN type : **Point to point tunneling protocol (PPTP)**

User name : **< enter the username that Cyta gave you >**

Password : **< enter the password that Cyta gave you >**

FREE VPN CONNECTION FROM HOME!

Click : Remember my sign-in info

Click : Save

The screenshot shows the Windows Settings application window titled 'Settings' with a blue background. The main heading is 'Add a VPN connection'. Below this, there are several input fields and dropdown menus:

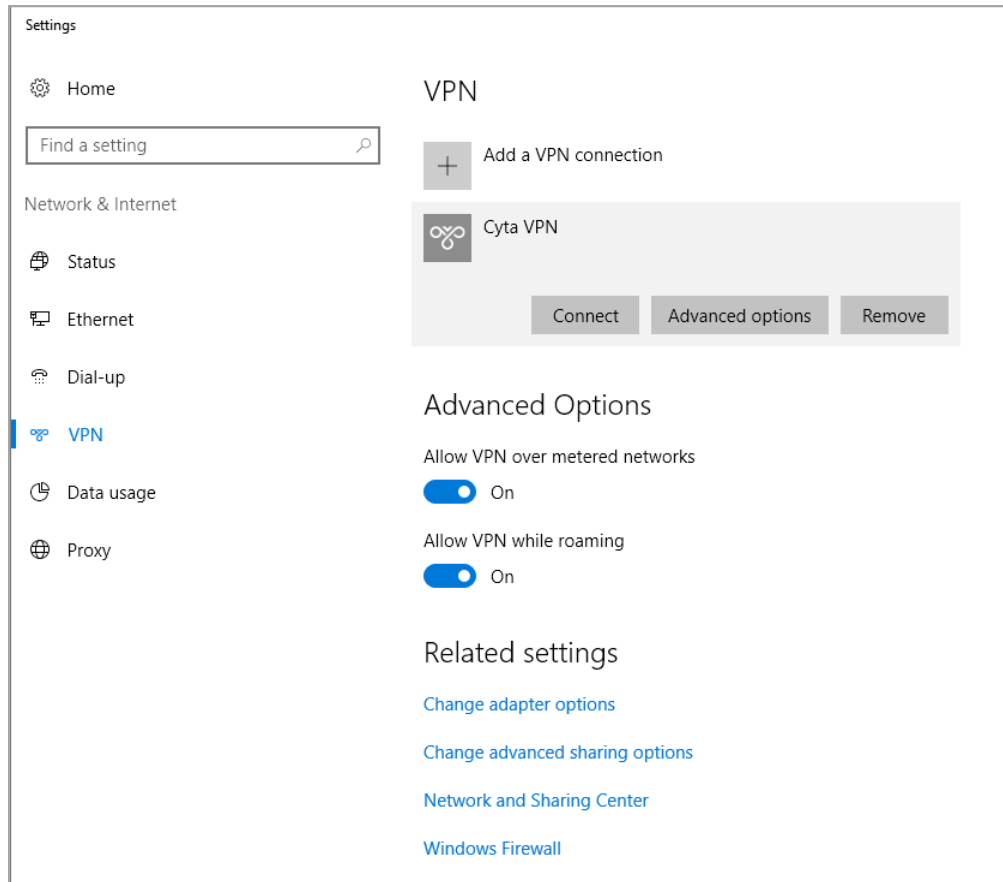

- VPN provider:** A dropdown menu with 'Windows (built-in)' selected.
- Connection name:** A text input field containing 'Cyta VPN'.
- Server name or address:** A text input field containing '195.14.129.98'.
- VPN type:** A dropdown menu with 'Point to Point Tunneling Protocol (PPTP)' selected.
- Type of sign-in info:** A dropdown menu with 'User name and password' selected.
- User name (optional):** An empty text input field.
- Password (optional):** An empty text input field.
- Remember my sign-in info:** A checked checkbox.

At the bottom right, there are two buttons: 'Save' and 'Cancel'.

2. USING THE CONNECTION

On the screen Windows Settings > Click 'Connect' on the icon 'Cyta VPN'

FREE VPN CONNECTION FROM HOME!

Note :

When the computer connects to the VPN it gets an IP address in the range 192.168.0.1/24 and can connect to any point within the corporate VPN.
